<td>Bachelor</td>
</tr>
<tr>
<td>[Bachelor/ Masters]</td>
<td></td>
</tr>
<tr>
<td>1.3 Recommended study</td>
<td>Journalism / Mass communication</td>
</tr>
<tr>
<td>programme/ qualification</td>
<td></td>
</tr>
</tbody>
</table>

2. Data on the discipline

<table>
<thead>
<tr>
<th>2.1 Name</th>
<th>Ethical Challenges in Digital Journalism</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Recommended qualifications for the teacher</td>
<td>Academic with journalistic background</td>
</tr>
<tr>
<td>[practitioner, theoretician, PhD holder in a certain field of study, etc.]</td>
<td></td>
</tr>
<tr>
<td>2.3 Year of study</td>
<td>Advanced</td>
</tr>
<tr>
<td>[entry level/ advanced]</td>
<td></td>
</tr>
<tr>
<td>2.4. Evaluation type</td>
<td>Examination</td>
</tr>
<tr>
<td>[examination/ project/ portfolio]</td>
<td></td>
</tr>
</tbody>
</table>

3. Preconditions (if applicable)

**[Who are the intended students]**

<table>
<thead>
<tr>
<th>3.1 curriculum preconditions (recommended previous courses)</th>
<th>NA</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 competences preconditions</td>
<td>Knowledge of general ethical (and legal) issues of journalism</td>
</tr>
</tbody>
</table>

4. Specific abilities

**[What do we want students to be able to do]**

<table>
<thead>
<tr>
<th>4.1. Professional competencies (job skills to be developed)</th>
<th>ethical journalism, social responsibility of journalism, media accountability</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.2. Transversal competencies (team work, critical thinking, global citizenship, etc.)</td>
<td>critical thinking, democratic values</td>
</tr>
</tbody>
</table>
5. Discipline’s objectives
[related to developing abilities & competencies]

5.1 General objective
The overall objective of the course is that students gain knowledge about the new ethical problems linked with the digital media and journalism environment and increasing sensibility of the journalism students regarding the digital ethical challenges. The students learn the special ethical issues of the digital media, and they get examples on handling these challenges. They will become more aware of how digital technology and increased two-way engagement with audiences are changing the nature of journalistic ethical decision-making and challenging it in new ways. The significance of the ethical problems is enlightened by their technical and social background. The whole seminar is based on the analysis of relevant ethical cases.

5.2 Specific objectives
[Learning outcomes – observable, measurable]
By the end of the semester, students in this course will:
• learn the difference among legacy journalism, citizen journalism and activist journalism,
• learn how to reach and use anonymous sources (including whistle-blowers)
• understand the importance of privacy in the digital media,
• learn fact checking technics,
• learn the importance of the transparency of the journalistic work,
• learn to moderate and respond to online comments,
• know the risks of live coverage, live streaming,
• learn how to refer articles published in other media outlets
• identify online tools to solve ethical challenges (source verification, comment moderation, accountability measurements and the like)

6. Content
[for 12-14 weeks]

<table>

| **Who is a journalist?**                           | Lecture, discussion, case study | journalism as a profession; are there objective criteria to define a journalist?  
who is it important the define “journalist” and “journalism”  
the notion of civic journalism  
using of the content produced by citizens (citizen journalism)?  
partisan or activist journalism and impartiality: is impartiality still a journalistic value?  
Journalists on social media (personal and professional pages) |
| **Anonymity, whistleblowing**                       | Lecture, discussion, case study | the value of anonymous sources  
how to check the credibility of anonymous sources?  
guarantees of the safety of whistle-blowers  
legal guarantees of the protection of information sources |
| **Cooperation between disclosure sites and journalists** | Lecture, discussion, case study | the role the disclosure sites (like WikiLeaks) in the public sphere  
what can be learned from the WikiLeaks story?  
ethical aspects of well-known cross-border investigations (Panama Papers, Lux Leaks etc) |
| **Speed vs accuracy, speed vs fair use of rivals’ results** | Lecture, discussion, case study | risks of the high speed of information circulation  
mechanisms to safeguard the accuracy of the information  
how to handle the users’ complaints?  
how to refer articles and information published by other media outlets in the sharp news competition? |
<table>
<thead>
<tr>
<th>Topic</th>
<th>Format</th>
<th>Content</th>
</tr>
</thead>
</table>
| **Risks of live coverage in the era of live streaming** | Lecture, discussion, case study | how to prepare a live coverage to minimise the risks?  
the risks of live streaming in the social media? |
| **Fake news – a new problem?**             | Lecture, discussion, case study | fake news stories from the history of journalism  
“traditional” mechanisms of the editorial teams to avoid spreading false information  
technical and social background of the current fake news problem |
| **Fact checking in the digital media environment** | Lecture, discussion, case study | best practices of fact checking tools and methods in the digital era |
| **Transparency of journalistic work**      | Lecture, discussion, case study | the notion and importance of transparency  
role of the journalists in the improving of media literacy |
| **The ethics of data**                     | Lecture, discussion, case study | ethical use of statistic data and other data sources  
ethical issues of data visualisation |
| **Offensive comments**                    | Lecture, discussion, case study | responsibility of the media outlet for the comments  
hate speech in the digital media  
how to moderate the debates |
| **Journalism as an ethical business**      | Lecture, discussion, case study | separation of ads and news in the digital media  
clickbait and other technics for increasing the turnover |
7.1. Compulsory (core) bibliography

7.2. Additional bibliography

8. How is the discipline connected to the expectations of the professional /epistemic community

The digital media, the social media, the mobile technologies changed the working conditions of journalists and traditional media outlets significantly. The speed of the information’s spreading, the amount of available data and sources, the secure technologies of anonymous data leaking, the direct user feedbacks in the comment section, the live streaming are huge possibilities for the high-quality journalism, but in the same time all of these factors conceal huge risks. The new media landscape raises several new ethical questions that must be answered in an even more competitive and distrustful environment.

9. How is the discipline connected to the rest of the journalistic / communication studies curriculum

The course is based on the general ethical and legal knowledge of the students, and is connected to all other courses dealing with the new skills of journalism. The learned ethical aspects should be used on the courses practical dealing with the journalistic profession and practice.
